DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although Volk et al. (US PAT No. 6,166,563) teaches a method and circuit for programming an output buffer impedance compensation, one of ordinary skill in the art would not have been motivated to modify the teaching of Volk et al. to further includes, among other things, the specific of the termination control device having a permission timing setting section for outputting a permission signal by timing predetermined length of time from a termination start signal and a state detecting section enabled by an alarm signal from the voltage detecting section for detecting a state of the predetermined lines as set forth in the claims

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jang et al. (US PAT No. 6, 762,620) discloses a circuit for controlling one-die signal termination.
